

We are a young and fast growing startup from Cologne, Germany. We develop a software platform for the digitalization of energy grids. For our team in Cologne we are looking for a

Project engineer (m/f)

Your tasks

- Technical project management and project controlling of our projects with distribution grid operators and energy suppliers
- Key account management with our customers
- Conception and implementation of interfaces and data import routines for customer data
- Support in strategic product development based on customer feedback

Your skills and expertise

- University degree in electrical engineering, engineering management or comparable education
- Experiences in the modeling and analysis of electrical networks
- Programming skills and interest in software development, e.g. in Python
- Fun in team work, high motivation, independent and hands-on working ethics
- Ability to achieve stretch goals in a highly innovative and fast paced environment
- Very good German and good command of spoken and written English

What we are offering

- A very good salary for a challenging and independent work
- The opportunity to work for a tech start-up shaping the energy transition
- Flexible working hours, free drinks and a young team with a high motivation
